- JavaScript Programming
- Python Programming
- Natural Language Processing using Python
- API Design and Development
- Responsive Web Design
- JS Frameworks: React, React native, Next js
- Java Spring Boot
- Object-Oriented Programming (OOP)
- Node.js
- NoSQL Databases
- Restful API
- Tailwind CSS

EDUCATION

University of Ghana
Accra, Ghana • Expected in 08/2023

Bachelor of Science: Computer Science

PROFESSIONAL SUMMARY

Computer Science student dedicated to improving skills through hands-on learning and development work. Proficient in mobile and web application development environments. Adept at using HTML5, JavaScript, React, React native and other programming languages to produce clean code. Well-organized and collaborative team player with strong communication and analytical abilities.

CERTIFICATIONS

- HTML5 - From Basics to Advanced level, Udemy
- CSS - Basics To Advanced for front end development, Udemy
- Flutter and Dart to create Android and IOS apps, Udemy
- Full Stack Web Application Development with Django Framework, Udemy
- Responsive Web Design, FreeCodeCamp
- Programing with JavaScript, Meta
- Version Control, Meta
- React Basics, Meta
- React Native, Meta

PROJECTS

Service Booking System | React, React Native, Node js |

- Developed a service booking system which includes a mobile app and an admin dashboard.
- Implemented Google Places Auto Complete and Google Maps to assist user in selecting location.
- Developed a REST API that connect the two applications using Node js, Express and mongoose. And used MongoDB as the database.

Collaborative To-do App API | Node js, Apollo GraphQL, MongoDB |

- Developed an API to help users organize and reprioritize their tasks more efficiently.
- Implemented user authentication and authorization using Json web token
- Users can view and update the progress of tasks and assign other users to tasks list to collaborate.

E-Commerce App | React Native, AWS Amplify |

- Developed an e-commerce application using React Native for the mobile where users can view and purchase products that are available.
- The backend of the application was developed using AWS Amplify which handles user authentication and authorization, and allow users to send their orders.
